Message from the Guest Editor

Dear Colleagues,

Medicinal plants are well-known to have various therapeutic values that can be used for treatment of many ailments, resulting from their content in bioactive phytochemicals with several biological properties. Many cardiovascular drugs such as reserpine, digoxin, and deslanoside are isolated and developed from plants. Natural products have always been a major source for drug development in cancer therapy. A considerable portion of anticancer drugs currently used in the clinic are of natural origin, e.g. Vinca alkaloids, taxanes and others. Some medicinal plants have demonstrated their action on the immune system, more research is still needed to learn more about the different properties and mechanisms involved in acting on the immune system. This special issue aims to give an overview of the latest progress in the field of medicinal plant research, and molecular pharmacology of plant extracts from cellular and molecular pharmacology to demonstrate the full potential of medicinal plants. Original research papers and review articles on these different areas are welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
