Deadline for manuscript submissions:

closed (31 March 2024)

Message from the Guest Editor

Dear Colleagues,

Chronic obstructive pulmonary disease (COPD) represents a significant global public health concern, resulting in substantial morbidity and mortality. Moreover, specific diseases tend to co-occur in COPD patients due to shared risk factors and biological interactions, compounding the disease's prognosis and societal burden, creating what is referred to as a "syndemic."

The substantial diversity within COPD has posed challenges in developing pharmaceutical treatments capable of effectively slowing the progression of the disease. Precision medicine strategies offer a potential solution by focusing on understanding an individual's risk factors for the disease and tailoring treatment plans based on factors such as disease mechanisms, environmental exposures, and psychological variables. It is of paramount importance to promptly identify COPD patients at high risk of adverse outcomes and to gain a comprehensive understanding, at a mechanistic level, as to why specific individuals present an elevated risk.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
