Deadline for manuscript  
submissions:

**closed (30 April 2024)**

### Message from the Guest Editors

It is now generally accepted that regular physical activity promotes the release of circulating myokines and metabolites during muscle contraction, which can influence neuronal functions, thus modifying neurotransmission in different brain regions and improving cognitive processes such as learning and memory. However, the involvement of multiple cellular and molecular mechanisms hampers the development of strategies to counteract and/or diagnose the cognitive decline underlying neurodegenerative diseases, underscoring the need for further investigations that enable the development of preventive approaches to minimize the impact of neurodegeneration. Therefore, this Special Issue aims to summarize the most recent evidence on the molecular mechanisms underlying neurodegeneration to identify new potential diagnostic, therapeutic, and preventive strategies to counteract cognitive decline.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
