## Molecular Advances in Alzheimer's Disease

Guest Editor:

## Dr. María-Salud García-Ayllón

Instituto de Neurociencias de Alicante, Universidad Miguel Hernández-CSIC, 03550 Sant Joan d'Alacant, Spain

Deadline for manuscript submissions:

closed (30 November 2022)

# Message from the Guest Editor

Alzheimer's disease (AD), the most common cause of dementia among the elderly, is characterized by loss of memory and other cognitive functions. The main neuropathological changes associated with AD include synaptic and neuronal loss, astrogliosis, and protein deposition.

This Special Issue will focus on reviews and original data manuscripts that concern (1) the molecular mechanism of Alzheimer's and other neurodegenerative diseases; (2) molecular targets for new Alzheimer's biomarkers; (3) the genetics of Alzheimer's and other neurogenerative diseases; (4) molecular targets for new therapeutic techniques for Alzheimer's; (5) the molecular mechanism of neuroinflammation in neurodegenerative diseases.

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
