Message from the Guest Editors

Dear Colleagues,

It has been well documented that natural components could play critical roles in modern anti-inflammatory drug development. Inflammatory substances are usually divided into two main categories: pro- and anti-inflammatory mediators. Among the inflammatory mediators and cellular pathways that have been extensively studied in association with human pathological conditions are cytokines, chemokines, eicosanoids and the potent inflammation-modulating transcription factor nuclear factor κ B. Natural components have been reported to exert anti-inflammatory activity both in vitro and in vivo conditions, and they have an impact on the pro-inflammatory gene expression, such as cyclooxygenase-2, nitric oxide synthase, pivotal cytokine etc. In this Special Issue, we will discuss the natural components, their roles in inflammation, and the therapeutic potential of these agents. The papers published here will surely contribute to proposing new additional insights into the anti-inflammatory mechanism of natural components.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
