

Molecular Mechanisms of Anti-inflammatory Phytochemicals

Guest Editors:

Dr. Sanguine Byun

Department of Biotechnology,
Yonsei University, Seoul, Korea

Prof. Dr. Natália Cruz-Martins

Deadline for manuscript
submissions:

closed (31 March 2022)

Message from the Guest Editors

Inflammation is a normal biological process. However, it is becoming increasingly clear that inflammation also plays a crucial role in the development and progression of many chronic diseases, including cancer, diabetes, cardiovascular diseases, arthritis, asthma, neurodegenerative disorders, and autoimmune diseases. This provides the rationale to develop agents that can target inflammation for the prevention and treatment of chronic diseases.

Phytochemicals are non-nutritive plant-derived compounds that represent a large library of bioactive molecules. Due to their diverse structures and cellular targets, phytochemicals provide broad therapeutic opportunities.

This Special Issue, “Molecular Mechanisms of Anti-Inflammatory Phytochemicals” will include *in vitro*, *in vivo*, and clinical studies on the anti-inflammatory effects and molecular mechanisms of phytochemicals, including therapeutic applications in chronic diseases, modes of action, target identification, structure-activity relationships, and identification and quantification of phytochemicals from new sources.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maurizio Battino

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
