Message from the Guest Editors

Dear Colleagues,

Although fungi tend to be opportunists, targeting only a fraction of the human population, fungal infections may have a serious clinical impact. As for bacteria, the widespread use of antifungal medicinal products has selected in time resistant pathogens. Fungal resistance to therapeutic agents is part of the larger phenomenon of microbial resistance. The small number of antifungal classes and the emergence of multidrug-resistant strains is particularly worrying. New compounds with known mechanisms of action may provide better or different safety profiles or improved pharmacokinetic profiles. Many plant extracts and natural pure compounds have been tested against a variety of fungal species, with different results and they may represent an alternative pathway leading to clinical development of novel antifungal medicinal products. Papers exploring antifungal development, particularly antifungal screening, antifungal target identification, molecular mechanisms involved in efficacy or safety aspects, physicochemical properties, and structure-activity relationships, will be considered for this Special Issue.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
