Message from the Guest Editors

Dear Colleagues,

Bacterial plasmids serve as a platform on which genetic material is constantly exchanged and new combinations of genes necessary for adaptation to environmental conditions are assembled. In recent years, it has been further boosted by the development and wide implementation of next-generation sequencing (NGS) technologies. In particular, this has revealed the important role of plasmids in the evolution of antibiotic resistance and the emergence of multidrug-resistant and extensively drug-resistant phenotypes in clinically important bacteria. This Special Issue is aimed at collecting original research and review articles on various aspects of plasmid biology.

Topics include, but are not limited to:

- Plasmid typing and classification
- Characterization of new plasmids
- Plasmid replication and plasmid stability
- Mobile elements in plasmid diversification
- Evolutionary and population dynamics of plasmids
- The role of plasmids in emergence of hypervirulent and/or multidrug-resistant strains

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
