### Message from the Guest Editors

Dear Colleagues,

This Special Issue will follow the 9th European Spores Conference, which will be held in Naples, Italy, on 15–17 April 2020 ([www.sporesconference.org](http://www.sporesconference.org)). Selected topics from those presented at the conference will be the core of this Special Issue on “Bacterial Spores”, focused on basic and applied research on spore-forming bacteria, mainly belonging to the *Bacillus* and *Clostridium* genera.

Based on these considerations, this Special Issue will gather papers from a number of leading scientists in the field, which is a very active area of basic microbiology research with a strong impact on applied sciences, ranging from health to food safety to bioremediation.

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
