Deadline for manuscript  
submissions:

**closed (31 December 2023)**

### **Message from the Guest Editors**

The application of fluorescent materials in biological system is rapidly growing. Different types of fluorescent materials, including organic small molecules, coordination compounds, polymers, inorganic nanoparticles (semiconductor quantum dots, carbon dots, MOF materials, nanoclusters), and hybrid nanoparticles have been used for bioimaging, monitoring biological species, and photodynamic therapy. However, these fluorescent materials were generally used to target specific tissues or cells. In recent years, fluorescent materials able to target subcellular structures/organelles or detect local properties of microenvironments have been rapidly developing. This Special Issue of the *International Journal of Molecular Sciences* aims to collect papers about the advances in fluorescent materials (fluorescent dyes or sensors) for subcellular localization or for detecting biophysical or physicochemical properties of subcellular structures/organelles or microenvironments.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
