Deadline for manuscript
submissions:

closed (30 June 2023)

Message from the Guest Editor

Recently, the HCC treatment landscape has rapidly expanded and is likely to continue to develop at a fast pace. This Special Issue aims to review the latest findings related to immunotherapy in HCC and future treatment perspectives. We aim to present the most recent developments in the HCC immune microenvironment and how this might inform HCC treatment moving forward and meet the requirements of immunotherapy for HCC. This Special Issue will explore novel immunotherapy combinations to improve the response rate and survival of HCC patients, biomarkers that could personalize immunotherapy to any patient's HCC, and cellular therapy in HCC. We are also open to suggestions from invited authors.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
