

Aquatic Organisms Models Dedicated to Disease

Guest Editors:

Prof. Dr. Malgorzata Kloc

Transplant Immunology, The
Houston Methodist Research
Institute, Houston, TX 77030, USA

Prof. Dr. Jacek Z. Kubiak

Dynamics and Mechanics of
Epithelia Group, Faculty of
Medicine, Institute of Genetics
and Development of Rennes,
University of Rennes, CNRS, UMR
6290, 35043 Rennes, France

Deadline for manuscript
submissions:

20 February 2025

Message from the Guest Editors

Aquatic organisms are an irreplaceable source of medicinal drugs and therapeutics, a perfect model system and indicator for many human diseases, and often also a source of remedies for environmental pollutants.

Over the past 30 years, scientists have identified over 20,000 novel biochemical compounds from aquatic organisms, and dozens have been tested in clinical trials. Cytarabine and vidarabine isolated from Caribbean sponges are used to treat leukemia and lymphoma, and systematic herpes virus infections, respectively. Ziconotide, a powerful analgesic drug, is isolated from the cone snail, and trabectedin (Yondelis), a marine alkaloid isolated from the tunicate, is used to treat advanced soft-tissue sarcoma and ovarian cancer.

For this Special Issue, we invite research studies and review articles on the recent progress in aquatic organisms as a source of medication for human diseases. In addition, papers on environmental pollutant markers that act as sources of anti-pollutant compounds are also welcome.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
