Deadline for manuscript  
submissions:

**closed (28 February 2021)**

### Message from the Guest Editor

Numerous studies have indicated that cellular metabolism and epigenetics are highly interconnected, contributing not only to physiological changes but also to numerous different human disorders and cancers. The epigenetic regulation of genes mediated by DNA- and histone-modifying enzymes (DNMT, HAT, HDAC, KAT, KDM, BET, etc.) is influenced by oncogene-mediated metabolic alterations. Such metabolic changes affect the presence or accessibility of cofactors that are required for the catalytic activity of epigenetic modifying enzymes. In addition, these metabolic alterations may produce oncometabolites that abnormally activate or inhibit such modifying enzymes, altering the epigenome. As a result, the interplay between metabolism and epigenetics is crucial for the development of human diseases and tumorigenesis. Discovering novel molecular mechanisms linking the two pathways and targeting their downstream substrates could provide novel therapeutic targets to treat patients with different diseases.

In this issue, we are particularly interested in the regulation and mechanism of epigenetic enzymes and metabolic enzymes in cancer.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
