

Advanced Research on Cardiovascular Disease and Its Emerging New Biomarkers

Guest Editor:

Prof. Dr. Luc Rochette

Research Team of
Physiopathologie et
Epidémiologie Cérébro-
Cardiovasculaires (PEC2, EA
7460), Faculté des Sciences de
Santé, Université de Bourgogne-
Franche Comté, 21000 Dijon,
France

Deadline for manuscript
submissions:

closed (30 April 2022)

Message from the Guest Editor

A biomarker is defined as “a characteristic that is objectively measured and evaluated as an indicator of normal biological processes, pathogenic processes, or pharmacologic responses to a therapeutic intervention”. Among the most validated biomarkers that are currently in use, inflammation-related markers are prominent. Innovative biomarkers have emerged as relevant contributors in the field of energy homeostasis, and as valid biomarkers of various cardiovascular and metabolic diseases. Among these presumed and specific biomarkers, several members of the TGF-Beta super-family, GDF15, GDF11, newly emerging cardiokines, miRNAs, and markers discovered via proteomics in relation to oxidative stress are involved in cardiovascular disease. The evaluation of their circulating levels might provide new insights into the course of the disease. Finally, innovative and specific biomarkers can also serve as new diagnostic markers for the detection of cardiovascular disorders to guide prognostication and emerging therapeutics. Authors are invited to submit original articles and review manuscripts addressing the topic of this Special Issue.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of
Odontostomatologic and
Specialized Clinical Sciences,
Sez-Biochimica, Faculty of
Medicine, Università Politecnica
delle Marche, Via Ranieri 65,
60100 Ancona, Italy

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
