### Message from the Guest Editors

For this Special Issue, we aim to address present challenges and opportunities within the tumor microenvironment field from mainly a molecular and biochemical perspective. We encourage submissions of high-quality original articles and review articles on cellular crosstalk with topics including innovative model systems and techniques. Signaling pathways, their relevance, and mechanisms of actions in selected tumor microenvironments will particularly be discussed. Our hope is to collect comprehensive up-to-date knowledge on the underlying biology controlling disease progression and, ultimately, patient survival.

### Keywords:

- cancer
- metastasis
- inflammation
- cancer-associated fibroblasts
- biomarkers
- multiplex imaging
- in vitro models
- animal models
- immunotherapy

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
