Message from the Guest Editors

Dear Colleagues,

Cancer is a major public health problem worldwide. With over 100 different types—and great phenotypic and genotypic heterogeneity within a single cancer type—it is very difficult to provide generalized and effective therapy. Thus, research has increasingly focused on targeted therapy based on small-molecule, monoclonal antibodies, as well as developing technologies capable of modulating the immune system, such as CAR-T or CAR-NK immunotherapies.

This Special Issue aims to collect the latest findings on molecular pathways and immunology targets in cancer. Original articles reporting biomolecular studies—including pre-clinical studies—reviews, and commentaries are welcome. Pure clinical studies will not be considered for this Special Issue.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
