Message from the Guest Editor

Dear Colleagues,

The renin–angiotensin system (RAS) plays a crucial role in the regulation of blood pressure, sodium handling, volume balance and in organ damage during its inappropriate activation. RAS overactivation directly contributes to the establishment of hypertension and cardiovascular diseases. However, recent evidence demonstrates an important role of RAS in metabolic disorders, diabetic disease, compensatory alterations in pregnancy, neurodegenerative disorders, among others. The study of the physiology and pathophysiology of RAS could bring new insights that enable a better comprehension of the mechanisms responsible for its regulation and interactions with signaling pathways, all of which may allow the development of new pharmacological targets.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
