Message from the Guest Editor

Infectious diseases are still a major public health problem today. Now, deciphering the pathogenic process is a challenge which is facilitated by the development of new high throughput technologies. Only omics approaches can achieve this goal. Each of these approaches brings its own data stream on infectious diseases. A systemic integration of these omics data enables results to be closer to reality. All these large-scale studies should eventually lead to the identification of biomarkers useful in both diagnosis and prognosis. It should also lead to the identification of new therapeutic targets and the development of new drugs. Finally, it is hoped that these approaches will lead to better patient management. This Special Issue is focusing on the various omics approaches taken separately or combined.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maurizio Battino

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
