Deadline for manuscript
submissions:

28 February 2025

Message from the Guest Editor

Dear Colleagues,

Zeolite, due to its unique molecular structure, has attracted great attention for its use in hydrogen storage, heavy metals, and wastewater recovery in recent decades. The functionalization of zeolite has also progressed into doping or support with other metal oxides for the improvement of performance efficiency.

Additionally, zeolite is widely used in biomedicine. Its unique porous structure and adsorption properties give it unique advantages in many medical fields, such as heavy metal and toxin absorption, anti-oxidation, separation and purification of biomacromolecules, and drug carriers.

This Special Issue welcomes original research articles and reviews in accordance with the listed keywords.

Dr. Siaw Foon Lee

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
