Deadline for manuscript  
submissions:

**closed (20 March 2024)**

### Message from the Guest Editor

Dear Colleagues,

Targeted therapies remain a significant need in prostate cancer; identifying and characterizing such pathways are critical for better overcoming resistance to current therapies. This Special Issue aims to focus on characterizing novel potential pathways for therapeutic targeting in urological cancers. The Special Issue will focus on review and new research topics related to defining biomarkers from which we can infer therapy resistance/response, the association of potential biomarkers with specific pathways related to disease progression, and possible potential targeted therapies. The submitted papers can span preclinical models, translation therapies, and clinical trials related to novel biomarkers or new pathways that can be targeted in any urological cancer.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
