Deadline for manuscript  
submissions:

**31 December 2024**

### Message from the Guest Editors

Dear Colleagues,

In recent years, new intriguing pathogenic pathways have emerged in Systemic Sclerosis (SSc). Their knowledge allows for a better stratification of the disease phenotype and a prediction of response of targeted-specific treatments in this rare systemic connective tissue disease. The discovery of new pathogenic pathways has indeed revolutionized the SSc world and has led to the approval of the first targeted-oriented drugs in SSc.

In this Special Issue for *IJMS*, we will focus on the new insights in the pathogenesis and management of SSc, particularly at molecular research level. Our aim is to provide new evidence that will help to improve the therapeutic approach to this complex disease, moving towards precision medicine.

Research papers and up-to-date review articles are all welcome.

Dr. Elisabetta Zanatta  
Dr. Corrado Campochiaro

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
