Deadline for manuscript  
submissions:

**closed (28 February 2022)**

### Message from the Guest Editor

Endocrine disruptors— also referred to as hormonally active agents, endocrine-disrupting chemicals, or endocrine-disrupting compounds—are chemicals that can interfere with endocrine (or hormonal) systems. These disruptions can cause various issues such as cancerous tumors, birth defects, and reproductive diseases. It has been known that endocrine-disrupting chemicals also increase the risk of various chronic disorders, such as obesity and diabetes. Obesity is a complex disease involving an excessive amount of body fat. Obesity is not just a cosmetic concern, it is a medical problem that increases your risk of other diseases and health problems, such as heart disease, diabetes, high blood pressure and certain cancers.

Contributions to this Special Issue will provide new insights into the correlation between endocrine disruptors and obesity, as well as its related diseases, and will deepen our understanding of how they induce adverse effects.

We encourage the submission of both original research articles and topical reviews on all aspects of endocrine disruptors and obesity-related diseases. All submitted articles will undergo peer review.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
