Message from the Guest Editor

IJMS has organized a series of Special Issues to highlight the latest advancements in science in order to be at the forefront of science in different fields of research. This editorial initiative of particular relevance, led by Prof. Dr. Marko Novinec of the *Enzymology* section, is focused on new insights, novel developments, current challenges, latest discoveries, recent advances, and future perspectives in the field of enzymology.

The present Special Issue, entitled “Latest advances in Enzymology”, aims to present recent research developments to the wider community involved in this field. We welcome contributions in the field of enzymology, which is at the intersection of physics, biology, chemistry, and/or chemical engineering.

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
