Message from the Guest Editor

Dear Colleagues,

Epilepsy and metabolic disorders can be considered one of the most extensive topics. So far, more than thousands of variants have been described; monogenic mutations and de novo mutations can cause moderate to severe epileptic and eating disorders, obesity, and cachexia. Moreover, recent studies on the transcriptomic of specific neuronal groups in less studied physiological states have revealed the appearance of less conventional modulators that govern neuronal tonic inhibition. These facts paint the complex picture of the physiology of ion channels, GPCRs, and accessory proteins in the brain involved in such disorders.

The scope of the Special Issue involves bringing together original research and review articles on GPCRs, ion channels, accessory proteins, and downstream signaling in networks causing epileptic and metabolic disorders, and thus summarizing and expand our knowledge of signaling processes and networks and highlighting new advances and methodologies that will ultimately advance our understanding of the current state of cell signaling processes in which epilepsy and metabolism are involved.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
