Deadline for manuscript
submissions:

closed (15 February 2024)

Message from the Guest Editor

Dear Colleagues,

Neurodegenerative diseases (ND) mainly include Alzheimer's disease (AD), Parkinson's disease (PD), multiple sclerosis (MS), amyotrophic lateral sclerosis (ALS) and concussion trauma encephalopathy (CTE). The number of patients with neurodegenerative diseases continues to grow, and is now approximately 1 billion; however, less than 30% of patients can be diagnosed and treated in a timely manner, and the causes of ND remain unclear. In order to intervene in the disease as early as possible, researchers are committed to finding biomarkers that facilitate the early diagnosis of NDs. This Special Issue welcomes the submission of papers that address the application of prodromal biomarkers in neurodegenerative diseases, including, but not limited to, comprehensive review or research articles.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
