Message from the Guest Editor

Dear Colleagues,

Dry eye disease (DED) is a common ocular surface disease affecting a significant percentage of the population. Caused by tear film homeostasis disruption, DED is characterized by dryness, inflammation, discomfort, and visual disturbances. This condition greatly affects the quality of life of patients, and can potentially lead to permanent vision loss.

The purpose of this Special Issue is to report recent molecular advances in DED to assist in developing a better knowledge of DED-related pathophysiological mechanisms, diagnostic methods, and therapeutic approaches.

Potential topics include, but are not limited to, both immune and adaptive immune responses, ocular surface signs and symptoms, diagnostic methods, new pharmacological treatments, and specialized drug delivery systems.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
