submissions:
closed (31 October 2022)

Message from the Guest Editor

Dear Colleagues,

In spite of all knowledge we have gained from research into mammalian fertilization and the physiological changes that the male gamete must undergo to be able to fertilize the egg, the actual sperm interaction with the egg, including binding and fusion, is still covered in a veil of mystery.

Sperm-egg membrane interaction and fusion is mediated by many molecular components. There are numerous molecules located on sperm and oocyte membranes that are part of key protein networks that differ in their protein composition.

This special issue is dedicated to the physiology of gametes and fertilization and aims to introduce the reader to new and original research targeting the molecular mechanisms involved in reproduction.

In order to understand the entirety of the fusion process involving the binding and fusion of mammalian gametes, new mechanisms that sperm and egg undergo during maturation as well as interactions between sperm and egg membrane proteins need further research.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
