Sciences, Sam Houston State
University, Huntsville, TX, USA

Deadline for manuscript
submissions:

closed (31 March 2022)

Message from the Guest Editor

Stress is a broad term that can refer to the adrenal response to noxious stimuli, both physiological and psychological, metabolic perturbances such as nutrient imbalances or exogenous insults such as toxins. Importantly, the somatotrophic and HPA axes often converge on pathways involved in mitigating the response to stress, regardless of the root cause, as well as having a significant degree of crosstalk to modulate each other's activities. The Special Issue "Growth Hormone Axis and Stress" of the *International Journal of Molecular Sciences* will provide an overview of the role of GH signaling in modulating the response to stress through a series of original research articles and reviews.

Topics include:

- GH/IGF axis and HPA axis activity
- Glucocorticoids and somatotrope function
- Diet, GH, and POMC activity
- Ghrelin and stress related behaviors
- GH and Nrf2 activity
- GH and stress resistance pituitary mutants
- GH and oxidative stress
- GH and ER stress
- Stress, GH, and muscle function
- Glucocorticoids and IGF-I signaling
- Stress and obesity
- Social stress and GH signaling

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. José L. Quiles

Department of Physiology,

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
