Recent Advances in Herpesviruses

Guest Editor:

Dr. Marisa Granato

 Laboratory Affiliated to Istituto Pasteur Italia-Fondazione Cenci Bolognetti, Department of Experimental Medicine, "Sapienza" University of Rome, 00161 Rome, Italy
Department of Human Sciences and Promotion of the Quality of Life, San Raffaele Telematic University, Via di Val Cannuta 247, Rome, Italy

Deadline for manuscript submissions: **20 September 2024**

Message from the Guest Editor

 α - β - γ -Herpesviridae belong to the Herpesviridae family. They share the same structure and cycle properties. Herpesviruses are organized in icosahedral capsids that surround DNA-stranded genomic DNA. Herpesviruses, have two cycle steps: they show a latent phase, without productive virions, and a lytic phase, with the release of mature virions. The lytic phase can be induced by several stimuli in vitro and in vivo. The acute infection persists in in vivo models in oropharyngeal epithelium without a release of productive virions. The lytic state is characterized by the expression of specific genes. The lytic proteins are necessary to organize the viral DNA in concatenameric structures and to form the mature capsids. The nucleocapsids are released from the nucleus to the cytosol compartements by a proposed specific model. The nuclear membrane leafts are necessary to organize the nuclear complex to induce the release and translocate the nuclear capsids into the cytosol. The latent phase is characterized by the expression of viral proteins involved in cellular and viral mechanisms. They regulate cell cycle progression, apoptosis and cellular proliferation.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
