Deadline for manuscript
submissions:

30 November 2024

Message from the Guest Editor

Dear Colleagues,

Kidney plays a main role for the regulation of body fluid homeostasis including the adaptation to hypoxia and anemia. Diabetic nephropathy is the most common causative disease of chronic kidney disease (CKD) and chronic renal failure (CRF). Erythropoiesis-stimulating Agents (ESAs) and hypoxia-inducible factor-prolyl hydroxylase (HIF-PHD) inhibitors largely changed the treatment of renal anemia. Recently sodium-glucose co-transporter 2 (SGLT2) inhibitors have been known to improve renal anemia and renal dysfunction. Our special issue would like to focus on the developments and current status of the diagnosis and treatments of various renal diseases.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
