Deadline for manuscript  
submissions:

**closed (25 April 2024)**

### Message from the Guest Editors

Dear Colleagues,

Noncovalent interactions dictate the physical properties of molecular systems, from nanoscale self-assembled architectures to biological building blocks. They are prevalent in nature and contribute to important processes such as molecular recognition and self assembly. The study of noncovalent interactions continues to evolve in both experimental and computational approaches. The combination of new approaches and technological advances makes new studies possible.

This Special Issue intends to provide a common platform for both experimental and computational scientists to share recent advances in the study of noncovalent interactions. Both original research articles and review articles in the fields of spectroscopy, molecular self-assembly, crystal design, electronic structure method development, computational modeling, and other related areas are welcome.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
