### Message from the Guest Editor

Dear Colleagues,

This Special Issue, "Advances in Molecular and Translational Medicine 2.0", is framed in the context of the most recent discoveries and achievements in biomedical research, which, together with the modern technological and applicative advances in medicine, are evolving towards a revolutionary approach to understanding human diseases and discovering new therapeutic methods. The study of the molecular and cellular mechanisms that regulate complex systems requires an intense interaction between basic and applied research. Translational medicine combines biomedical skills and advancements in basic research with clinical reality. For this Special Issue, original and observational studies, as well as reviews, clinical cases and proof-of concepts in the broad fields of laboratory, clinical and health research, are welcomed.
