Deadline for manuscript
submissions:

20 September 2024

Message from the Guest Editor

Dear Colleagues,

In some types of cancer, targeted therapies have displaced the standard of care treatment plans, whereas in others they are employed as a second-, third-, or later-stage setting when the primary treatment plan fails. The success of targeted therapies is associated with the comprehensive and thorough analysis of the tumor microenvironment and the identification of novel immunomodulatory proteins. The upregulation or structural modification of such proteins has been shown to manipulate the immune system, promoting cancer cell survival and metastasis. Therefore, an in-depth understanding of the structure–function relationships in cancer-driven immunomodulatory proteins would lead to the discovery of a new generation of therapeutics.

This Special Issue is open to original research and review articles from different disciplines. We welcome studies that provide key insights into the structure and/or function of cancer-triggered proteins and protein complexes, including fusion proteins.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
