Deadline for manuscript
submissions:

closed (30 November 2023)

Message from the Guest Editor

Dear Colleagues,

Rare diseases are a general healthcare problem worldwide due to a lack of appropriate research investments, which impinge on the absence of specific biomarkers for a timely diagnosis and the lack of appropriate therapeutic interventions. Among the rare diseases are several types of cancer, including pediatric tumors as retinoblastoma and neuroblastoma, head and neck tumors, some types of leukemia and lymphomas, gastrointestinal tumors, neuroendocrine tumors, etc.

This Special Issue will highlight new findings regarding the molecular mechanisms underlying the development of rare tumors, for diagnostic and therapeutic purposes. Original research articles and reviews are welcome.

Dr. Gabriella D'Orazi

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
