Deadline for manuscript
submissions:

20 July 2025

Message from the Guest Editor

Dear Colleagues,

Renal disease is defined as a heterogeneous group of disorders affecting kidney structure and function. Acute kidney injury (AKI) is a common clinical syndrome characterized by a sudden decline in loss of kidney function. The presence of other pathological conditions, such as diabetes and hypertension, contributes to the transition into chronic kidney disease (CKD). Current knowledge about the kidney repair mechanisms reports the existence of a population of resident stem cells in the kidney, known as ARPCs (Adult Renal Progenitor Cells), which can reestablish a functional tubular epithelium. Renal regeneration can occur by direct proliferation and differentiation of stem progenitors, or by the paracrine pathway, through the release of extracellular vesicles containing miRNAs and regenerative factors. New insights on the molecular mechanism of action underlying kidney injury and repair would provide early biomarkers to predict clinical outcomes and targeted therapies to prevent injury and delay the progression to chronic kidney disease.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
