Message from the Guest Editors

I am pleased to announce that a Special Issue on the topic “Immune Cell Regulation during Inflammatory Responses” is being prepared for publication in the journal IJMS. The immune system is composed of innate and adaptive immune cells, and the harmonious interaction among various immune cells is indispensable for maintaining homeostasis. However, aberrant inflammation is developed repeatedly during antigenic stimulation in cases of infection or autoimmunity. The aim of this Special Issue is to expand our understanding of immune cell regulation when undesired events are elicited. We encourage our colleagues to contribute to the advancement of immunology through the submission of original papers and reviews on this widely discussed topic: inflammation and immune cell regulation during infectious or autoimmune diseases and tumorigenesis.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
