Message from the Guest Editor

Lipids, one of the basic building blocks of life, play a critical role in organismal physiology. Several classes of lipids and their downstream metabolites act as secondary messengers. These molecules interact with a variety of cellular targets including G-protein-coupled receptors, ion channels, nuclear receptors, kinases, etc. However, these endogenous lipids often have poor drug-like properties, since they are highly lipophilic with scarce water solubility, metabolically unstable, and poorly bioavailable. Therefore, it would be valuable to design novel molecules such as enzyme inhibitors that stabilize endogenous lipid mediators (e.g., ibuprofen) and mimics that act as agonists or antagonists of lipid signalling pathways. In addition, novel drug delivery systems could be developed to directly administer these specific molecules to target organs. In this Special Issue, we aim to present and discuss novel therapies targeting lipid signalling pathways.

Keywords

Lipid signalling molecules
Enzyme inhibitors
Agonist
Antagonist
Drug discovery and development
Drug design

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
