Message from the Guest Editors

Dear Colleagues,

This Special Issue "Recent Advances in Tumor Microenvironment and Molecular Targeting in Multiple Myeloma and Chronic Lymphocytic Leukemia" of the *International Journal of Molecular Sciences* focus on the biological, translational and clinical advances achieved by the targeting of tumor microenvironment and of actionable genomic lesions as well as on the mechanisms at the basis of treatment resistance, thus paving the way for the design of better treatment strategies.

We welcome original basic, translational and molecular biology-driven clinical research articles as well as review articles leading to improvement of the understanding of both MM and CLL pathogenesis.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
