### Message from the Guest Editors

Dear Colleagues,

The healthy normal cornea is known as an avascular tissue. However, newly growing blood vessels, corneal neovascularization (NV), can invade into the cornea in various pathological conditions, such as infectious keratitis, injuries, and corneal transplantation. There are 12 million people who have vision impairment by corneal NV in the United States. The corneal NV process can be regulated by many growth factors, cytokines, chemokines, and MMPs. Particularly, MMPs participate in multiple cellular processes, including remodelling of basement membrane by breaking extracellular matrix (ECM). Interestingly, membrane-type MMPs are tethered to the plasma membrane and complexed with different substrates. This special issue will discuss various roles of MT1-MMP depending on which substrate interacts with it in pathological angiogenesis, corneal NV, and other diseases.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
