Message from the Guest Editor

Dear Colleagues,

In recent years, several novel treatment options have been investigated for the treatment of ocular surface diseases. This Special Issue titled “Advance Research about Ocular Surface in Ophthalmology” will focus on recent molecular research in the field of the ocular surface in ophthalmology. However, although promising clinical outcomes have been revealed in real-life studies by the current agents available for treating these diseases, there is still a need for improving the long-term clinical efficacy, by simultaneously decreasing the treatment burden and patients’ compliance. We welcome publications on new findings concerning the pathogenesis, genetic analysis, diagnostics, and therapy of ocular surface diseases, such as Stevens–Johnson syndrome, ocular cicatricial pemphigoid, and dry eye syndrome, as well as all the involved molecular pathways. Data on molecular mechanisms or pathophysiology are essential, and papers that only contain clinical trials/data are not acceptable. We invite contributions including reviews and/or original papers that report new results about biological ocular rehabilitation.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
