

Macrophages in Respiratory Diseases

Guest Editors:

Dr. Yi-Giien Tsai

Dr. Chih-Hsing Hung

Dr. Hung-Ming Wu

Deadline for manuscript
submissions:
closed (20 April 2023)

Message from the Guest Editors

Dear Colleagues,

Macrophages are heterogeneous and plastic, and their function is regulated by the surrounding microenvironment. Macrophages are key components of the innate immune system and are involved in the regulation of inflammation, repair, and regeneration. Many studies have documented the pathophysiology of macrophages including transcription factors, epigenetic regulation, differentiation, polarization, migration, cytokines, and chemokines production and function in diverse human disorders such as allergy, autoimmunity, inflammation, and cancer. This Special Issue aims to focus on both basic science and translational research as well as new advances in clinical evidence in order to have a more complete comprehension of macrophages and their impact on respiratory diseases.

We invite investigators to contribute original research articles and review articles that will address the molecular mechanism of macrophages in the immune response to respiratory diseases. Please note that pure clinical or model studies are unsuitable for this journal, but clinical submissions with biomolecular studies are welcome.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. José L. Quiles

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
