Deadline for manuscript  
submissions:

**closed (30 January 2024)**

### Message from the Guest Editor

Metabolic diseases are associated with neurodegeneration and cognitive dysfunctions. The onset of peripheral and central insulin resistance conditions is proposed as the primary link among metabolic and neurodegenerative diseases. Brain insulin resistance induces impairment of insulin signaling, activation of oxidative stress, ER stress, mitochondrial and lysosomal dysfunction, lipid peroxidation, inflammation and alteration of synaptic plasticity, and mechanisms leading to loss of neurons. A healthy lifestyle can reduce or prevent the risk of these dysfunctions. Dietary supplements of natural origin, rich in antioxidants and anti-inflammatory molecules, can significantly impact metabolic and neuronal dysfunction and related comorbidity.

The Special Issue aims to collect original research articles and full review papers focused on, but not limited to, the mechanisms inducing peripheral and central dysmetabolism. Contributions related to signaling, organelles, mechanisms, and molecules involved in homeostasis and metabolic and neurodegenerative disease dysfunction are welcome. The potential protective role of bioactive molecules and functional food is also considered.

an Open Access Journal by MDPI

## Editor-in-Chief

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
