Message from the Guest Editor

Dear Colleagues,

Over the last decades evidence has accumulated showing that crosstalk between cancer cells and the microenvironment plays an important role in tumor initiation, progression, and metastasis. Novel targeted treatments and immune therapies have emerged specifically focusing on altering the interaction between tumor cells stroma, immune cells, and vasculature. In the current series, we invite papers dealing with the basic research, translational research, and clinical studies on the interaction between the tumor cells and their microenvironment.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
