### Message from the Guest Editors

Dear Colleagues,

A large number of research teams in Japan from different institutions and universities are working together and studying the molecular mechanisms of immunity, immunogenetics and/or immunopathogenesis. This Special Issue of the *International Journal of Molecular Sciences (IJMS)* aims to rapidly publish original contributions addressing questions of importance in immunology and related fields from Japan. We welcome manuscripts conveying novel experimental findings that would advance our understanding of the molecular mechanisms of immunity, immunogenetics and/or immunopathogenesis. Manuscripts reporting the development or testing of novel therapeutics that target molecular mechanisms are likewise sought.

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
