### Message from the Guest Editors

Dear Colleagues,

Nontuberculous mycobacteria (NTM) are opportunistic pathogens, causing pulmonary diseases largely in immunocompromised patients or patients with pre-existing lung conditions, such as bronchiectasis, chronic obstructive pulmonary disease, and cystic fibrosis (CF). The NTM incidence (3.3 to 22.6%) is growing in particular among CF patients worldwide. NTM lung disease treatment is challenging due to the long and often unsuccessful therapy. Increasing research and drug discovery efforts are mandatory to have significant therapeutic advances for NTM diseases.

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
