**closed (31 July 2023)**

### Message from the Guest Editor

Dear Colleagues,

Natural bioactives, such as polyphenols, terpenes, and alkaloids, have been described as modulators of several biochemical pathways involved in cell survival and apoptosis. These molecules may have a relevant role modulating cell proliferation, by regulating specific targets, acting as anticancer natural drugs, or favoring cell repair. The boundary between what are the bioactive molecules with an anticancer potential and toxicity is very weak; hence, there is a need to identify the molecular targets of natural bioactives, aiming to validate their potential effect. This Special Issue aims to cover a selection of research papers and reviews that expands and deepens the knowledge regarding the cellular molecular targets of natural bioactives described as having an anticancer activity. Therefore, we sincerely welcome studies reporting the action of natural compounds as novel anticancer agents, emphasizing the mechanisms of action, the molecular targets, active substance verification in vivo and in vitro, and new experimental approaches to enhance their efficacy.

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
