

Updates on Neuroendocrine Research in Health and Disease

Guest Editor:

Dr. Ilaria Ceccarelli

Department of Medicine, Surgery
and Neuroscience, University of
Siena, 53100 Siena, Italy

Deadline for manuscript
submissions:
closed (15 March 2023)

Message from the Guest Editor

In the recent years many of the neuroendocrine studies have been focused on the Diffused Neuroendocrine System (DNS), a heterogeneous group of specialized cells, of various embryologic origins, that works by the integration of different structures such as the endocrine pancreas, the anterior pituitary, the adrenals, acting as a regulatory organ. The anatomical, embryologic and functional differences among these cells can explain the heterogeneity of their pathologies. To this heterogeneity corresponds a variety of neuroendocrine tumors, and research on this field has markedly increased, with particular efforts to find early biomarkers of pathogenicity. This Special Issue is focused on Neuroendocrine Research in Health and Disease, and it would include original articles on both physiological and pathological aspects related with alterations of the Neuroendocrine system.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of
Odontostomatologic and
Specialized Clinical Sciences,
Sez-Biochimica, Faculty of
Medicine, Università Politecnica
delle Marche, Via Ranieri 65,

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
