It is our pleasure to announce a new Special Issue of the *International Journal of Molecular Sciences* on “**Advances in Neurogenetics and Neuroimmunology**.” With this Special Issue, we intend to collect both original contributions and review articles focused on:

- i. Research directions towards the identification of complex genetics and the unique immunological pathways involved in the development of various brain disorders;
- ii. The investigation of the underlying biochemical and molecular mechanisms with an aim to develop novel targeted therapies;
- iii. The ongoing advancements in research and the future perspectives on the transition from the bench to bedside.

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
