and Therapeutics, The University  
of Melbourne, Victoria 3010,  
Australia

Deadline for manuscript  
submissions:

**closed (30 June 2022)**

### Message from the Guest Editor

Parkinson's disease (PD) is a chronic neurodegenerative disease characterised by motor dysfunction due to a loss of dopaminergic neurons. Recent clinical, epidemiological and experimental evidence has implicated neuroinflammation in contributing to the neuronal cell death and progression of PD. This chronic neuroinflammatory response within the central nervous system is driven by the resident immune cells of the brain, the microglia and astrocytes; however, recent studies have identified an important contribution of the peripheral immune response to the CNS pathology in PD. This aim of this Special Issue is to gain a greater understanding of the complex molecular mechanisms that lead to chronic neuroinflammation in PD and how these contribute to the dopaminergic cell death in the brain. Both high-quality original research and review articles are welcome discussing the following: neuroinflammation in cell-based and animal models of PD, microglia and astrocytes in PD, the gut-brain axis, the role of the peripheral immune response, and the development of therapeutic strategies targeting neuroinflammation.

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Maurizio Battino

Department of  
Odontostomatologic and  
Specialized Clinical Sciences,  
Sez-Biochimica, Faculty of  
Medicine, Università Politecnica  
delle Marche, Via Ranieri 65,  
60100 Ancona, Italy

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
