Message from the Guest Editor

Dear Colleagues,

Research on neutrophil biology has been expanding recently. NETs formation, NETosis, and their role in diseases or their models is one such research area. Another area involves research on the fate of neutrophils during resolution, cell death, phagocytosis of dead neutrophils, and/or reverse migration. Upon inflammation, neutrophils are recruited to the site from the reservoirs by means of not only chemokines but also other mediators. Subsets of neutrophils have also been identified in various settings. Various hereditary diseases in mice and humans have also been described, unveiling the hitherto unrecognized regulatory mechanisms of neutrophil development. There may be unknown, perhaps not fully characterized, phenomena in neutrophil biology. Taken together, I would like to urge researchers who have engaged in such research areas actively to provide along with their results, their thoughts and the current status of their research area, so that readers can enjoy reading innovative papers and that help predict the future directions of neutrophil biology.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
